PRACTICE PLAN DRILLS FOR COACHES

10U	DRILL 1	DRILL 2	DRILL 3	DRILL 4
	STEALING BASE	BANANA CURL RUN	FLY BALL TAG UP	ROUND THE BASE
BASERUNNING	Teach player proper sprint position from the base and best launch position footwork to explode off the base with acceleration when stealing a base upon the pitcher's release of the ball. This drill includes the player watching the pitcher intently to notice the release and begin the steal.	Line up players at home plate and teach them the art of beginning a curl before they reach 1B to shorten the number of steps needed to reach 2B. This includes lowering the shoulder, making a tight turn at 1B, stepping the bag with their right foot and running hard and straight to 2B.	Place runners at 1B and 3B with appropriate base coaches. Parent volunteers are in the outfield and in the infield. Coach throws/hits a fly ball to the outfield and runners either	Place runners at Home and 2B and let them run the base to follow coach instructions on whether to stop, round the base or proceed to next base. The players understand their

PITCHING (position)	FORM	ACCURACY
	Working with players individually, teach each player the step-back rule, hands-together-once rule, and proper form for pitching. Effective pitching involves square-stride-finish criteria, including squaring the body, striding out and finishing strong with the arm, including an effective release point.	Help players build pitching confidence by pitching at distances of 15', 20' and 35'. Once a player is warmed up and able to successfully pitch three strikes in a row, encourage them to back up 5' and continue again. The progressive distancing helps build control and confidence.

CATCHING (position)	FORM MECHANICS FRAMING	BLOCK PITCHES RUN BACKS
	Teach the catcher proper positioning, including directly behind the plate, hand behind the back, squat low enough for umpire to see the pitch and re-positioning the glove on a close pitch to help aid the pitcher earn the benefit of a close call.	Using either softballs or tennis balls, catcher drops to her knees and let the ball bounce forward off chest protector to keep runners from advancing to the next base or score on a passed ball. This also includes slow walk back of the runner to 3B while still protecting the plate.

THE BASICS	SITUATIONAL PLAYS	KNOW OUTS
	Great way to get everyone involved. Work on baserunning, fielding and decision making simultaneously. Place base coaches by bases and defensive coaches in field with one coach hitting balls and players fielding and running. Conduct a "simulated" game.	During simulated game in the situational play drill, make it fun by awarding points for players who can answer how many outs there are the first player to indicate where the ball will go with the ball if hit to them, keeps players engaged in drill.

10U SOFTBALL | PRACTICE PLAN DRILLS

These drills can be used interchangeably to help provide quality instruction and positive practice experiences for players. Each drill can run approximately 20-30 minutes and 4-5 drills can be combined to develop a robust practice plan that can involve stations to teach specific skills as outlined in the Player Development Progression framework.

10U	DRILL 1	DRILL 2	DRILL 3	DRILL 4
	UNDERHAND TOSS FOR CLOSE PLAYS	NOT HOLDING THE BALL	SHOULDER SQUARE THROWS	RELAY THROWS
THROWING	Place half of players at 2B fielding position and SS fielding position. Each player at SS has a softball in hand. The player at 2B runs toward the base and SS tosses the ball to the covering player. The players switch sides after the toss and catch. This can be done with or without their gloves.	Place players evenly in CF or LF. And also place on player each at 2B (base), SS or 3B (base). Coach throws or hits a ball to outfielder or in the gap for CF or LF to field. SS then calls either 2B or 3B and the fielder throws the ball quickly to the designated location.	Each ballplayer places their bat in front of their feet while playing catch. The fielder catches the ball from teammate or coach and then turns body so feet are on both sides of the bat and their arm is back and elbow is even with the shoulder. Then player returns the throw from the position.	Players line up in a straight line all facing the same direction. Ball begins at one end and throws to each cut off. Players catch the ball with two hands, turn toward glove side and quickly and accurately throw the ball to the next cut-off player in line. The ball comes back from opposite direction.
	CUT-OFFS	FLY BALL FORM, STEP BACK	BACKHAND CATCH	BACK-UP PLAYS
FIELDING	Players line up in a straight line all facing the same direction. Ball begins at one end and throws to each cut off. Players catch the ball with two hands, turn toward glove side and quickly and accurately throw the ball to the next cut-off player in line. The ball comes back from opposite direction.	Players begin in an outfielder's position of a 45-degree angle. The coach hits or tosses a fly ball. Players takes first two steps back, gauges the trajectory of the ball and either continues backward or charges the ball while preparing to catch the fly ball over their head with two hands.	Players line up in multiple lines to match the number of coaches able to execute the drill. Coach throws the ball to player so a backhand catch is required. Player executes a crossover step, turns their body and positions glove for an effective backhand catch and tosses ball back to coach.	Set up players in RF and LF to back up throws to 1B and 3B, respectively. Coach hits ground balls to either 2B or SS and the fielder throws the ball across the field to the base and the outfielder is positioned at the correct angle behind 1B or 3B to field any overthrows that may occur.
	BALL-STRIKE COUNT	STANCE/POSITION	BUNTING	AVOID GETTING HIT
HITTING	Hitters are in the cage or batter's box on the field and receive batting practice. Each set of pitches reflect a batter's experience with 4 balls, 3 strikes or a hit for an effective at bat. This enables the batter to understand pitch count and what steps to take to hit aggressively vs. protect the plate.	All batter's stance in the box is custom for each and every player. However, position in the box can be influenced by the speed of the pitcher. Coach should provide varying speeds of pitches and help batter understand whether they should be in the front, center or back of the box.	Teaching the pivot bunting form, the batter should aim for angling the bat at a 45-degree angle, and tapping the ball toward the 1B or 3B line by angling the bat accordingly. Based on this skill, the coach should place pylons approx. 25 feet from home for players to target for a successful bunt.	Using tennis balls, wiffle balls or even rolled socks, players should take their position in the batter's box and learn to step away from an inside pitch and, if not feasible, then to turn away from an inside pitch so a pitch may hit them in the back as opposed to their torso.
